

Amirreza Mirzazadeh

Born in July 2000

living in Karaj

User Experience / User Interface Designer

About Me

Hello 🙋, I'm Amirreza

With +4 years of experience in graphic design, user interface design and user experience design rules and methods

Work Experience

Studio Nazar

Ux/UI Designer

Aug 2023 – Present / 10 mos

I worked in "Nazar Studio" on their exclusive product called "Apwa", which includes several enterprise applications needed by Enterprise organizations.

"Apwa" panel includes features such as form builder, user management system, process builder, page builder, file manager, etc. During my cooperation with this team, some of these features were improved in terms of user interface and user experience, and some of these mentioned features were designed for the first time and prepared for development.

WebTab Digital Marketing Agency

Graphic Designer / Ux/UI Designer

Feb 2021 – Aug 2023 / 2 yrs 7 mos

I joined "WebTab" as a graphic designer, but soon switched to a ux/ui designer and experienced various challenges.

My activity in "WebTab" has included designing services and applications in different fields such as medical, taxi, payment service, construction service, restaurant reservation, etc.

WebWhite Digital Marketing Agency

Graphic Designer

Jun 2020 – Jan 2021 / 8 mos

As a junior graphic designer, I started working at "WebWhite" and was responsible for designing website banners and social media posts and such works.

Ux/UI

More than 4 years have passed since I started working in the field of ui/ux.

During this time, I have had the experience of working in different ways with different teams, I have had the experience of working full-time, part-time (on-site, hybrid and remote).

I also have experience working and interacting with technical and marketing teams.

All stages of **user research** and study, drawing the **road map** and user path, designing and reviewing the **information architecture**, drawing the **flowchart** and **user flow**, drawing the initial design on paper and drawing the **Low Fidelity and High Fidelity wireframe**, designing the **user interface**, **prototyping** and **presenting** it to stakeholders I have experienced.

During this time, I have done various projects in different categories such as process builders, admin panels, advertising landings, reservation systems, IOT, medical, transportation, payment, etc. for different devices (mobile, desktop, etc.).

Thanks for watching my CV
