About Me

I am Amirreza, a UI/UX designer with over 5 years of experience creating intuitive, user-centered interfaces. With a background in computer engineering, I specialize in designing seamless solutions for enterprise and startup environments, driven by a passion for solving user challenges through collaboration and innovation.

Hard Skills

UI Design   UX Design   User Research

Design Tools   Project Management

Interaction Design   Prototyping

Front-End Basics   Accessibility

Design Systems   Motion Design

Data Analysis   A/B Testing

Information Architecture

User Journey Mapping

Work Experience

Studio Nazar

Ux/Ui Designer

Aug 2023 - Present / +20 mos

Using tools like Figma, I worked on "Nazar Software," an enterprise application platform, designing and enhancing UI/UX for features such as **form builder**, **user management**, and **process builder**. As the sole designer, I familiarized myself with the existing product, addressed challenges like complex access controls and feature integration, and delivered effective solutions through research, competitive analysis, and collaboration with the development team.

WebTab Digital Marketing Agency

Graphic Designer / Ux/Ui Designer

Feb 2021 - Aug 2023 / 2 yrs 7 mos

Using Figma and Adobe XD, I began as a graphic designer and transitioned to UI/UX design, creating interfaces for services in **healthcare**, **transportation**, and **education**. I overcame challenges like aligning with development teams and managing client-provided wireframes under tight deadlines, delivering user-friendly designs that met project requirements and received positive client feedback.

WebWhite Digital Marketing Agency

Graphic Designer

Jun 2020 - Jan 2021 / 8 mos

Designed website banners, social media posts, and visual content for digital campaigns, adapting to diverse client needs and tight deadlines, contributing to successful campaign launches.

Soft Skills

Problem-Solving   Collaboration

Communication   Adaptability   Empathy

Time Management   Attention to Detail

Resilience   Decision-Making

Critical Thinking   Conflict Resolution

Creativity   Stakeholder Management

Active Listening

Ux/Ui

With over 5 years of experience in UI/UX design, I have collaborated with development and marketing teams, undertaking activities such as user research, user journey mapping, designing low- and high-fidelity wireframes, user interfaces, prototyping, and product testing. Prior to Nazar Studio, I designed over 13 applications, services, and advertising landing pages for small startups, most of which were ready for development, with more than half successfully developed, earning client approval for their usability. In the past two years, I focused on reviewing and enhancing Nazar Software, an enterprise application platform, addressing challenges like improving the mobile version, adding new services, and integrating application features, achieving positive results through collaboration with the development team. My projects span reservation systems, IoT, healthcare, transportation, payment, advertising landing pages, administrative panels, and enterprise applications, with details available in my portfolio.

Tools

Figma   Adobe Xd   Miro   Zeplin

Illustrator   AfterEffects   Photoshop

Notion   Jira   Html   Css

Google Analytics   Hotjar
